SUMMARY

MSc Business Analytics candidate with 3+ years at Ubisoft supporting release readiness across technical and product teams. Experienced in KPI tracking, statistical analysis, simulation modelling, and data-driven decision support. Interested in applying analytics and machine learning to support data-driven decision-making, forecasting, and optimisation in business contexts.

TECHNICAL SKILLS

Analytics Tools: Python (Data Cleaning), SQL, Excel (Advanced), AnyLogic, JIRA, Confluence, Tableau, Power BI

Analysis Methods: Predictive Modelling (Regression, Classification), Feature Engineering & Anomaly Detection (basic)

Business Strategy: Optimisation & Simulation Modelling (Scenario Analysis, System Optimisation), Risk Assessment, Strategic Planning

Quality Assurance: Release Validation, Regression Planning, UAT, Mobile Compliance (iOS/Android)

Data Concepts: Time Series Analysis & Forecasting Techniques, Relational Data Modelling (DBMS), Data Integrity, Root Cause Analysis

PROFESSIONAL EXPERIENCE (3+ YEARS)

Data Analyst (Gaming) | Ubisoft, Pune, IND | Full Time

July 22 – July 25

- **Project: Gaming Analytics & Business Intelligence**

- Designed 10+ KPI dashboards (Tableau & Power BI), improving reporting efficiency by **35%**
- Reduced manual reporting by **50%** using optimised SQL queries and automated pipelines
- Applied statistical analysis on large-scale datasets to identify anomalies, performance patterns, and operational inefficiencies
- Supported behavioural and performance analysis to inform KPI definition and improve decision-making across product teams
- Contributed to system-level performance optimisation through structured statistical and scenario-based analysis

Data Analyst Intern | Kuber Enterprise, IND | Internship

Feb 18 – Feb 19

- **Project: Business Intelligence & Operational Reporting**

- Collected, cleaned, & analyzed complex data using **Python & Excel**, improving reporting accuracy by **20%**
- Implemented management dashboards tracking **8+ KPIs** to directly support data-driven strategic decisions
- Translated statistical findings into actionable insights, reporting to stakeholders to optimize business operations

PROJECTS & INNOVATION INITIATIVES

- **University of Southampton – Easter Innovation Challenge (AI & Decision Systems) Mar 23-26, 2026**

- Selected as one of 9 participants from 80+ applicants following a rigorous multi-stage assessment process
- Led competitive market analysis to evaluate strategic benefits and operational feasibility for **Northrop Grumman**
- Designed “The Brain”, a multi-agent LLM module to drive efficiency through secure backend reasoning
- Executed the prototype strategy within a strict 48-hour timeframe, applying deep AI and domain knowledge
- Pitched the comprehensive business report and technical strategy directly to Northrop Grumman executives

- **University of Southampton – MedTech Innovation Programme (6-week certification)**

- Completed a 6-week programme focusing on translating complex healthcare accessibility barriers into streamlined, user-centric solutions
- Designed the operational logic for an accessible smart medication dispenser featuring pinch-free dispensing and wireless charging
- Formulated a responsive adherence system integrating colour-coded alerts and automated remote caregiver notifications for missed doses
- Authored a comprehensive product feasibility report and successfully pitched the finalised MedTech strategy to an evaluation panel

- **BOSS Global Business Competition 2026 (Ongoing)**
 - Managed end-to-end operations of a simulated holiday enterprise in a highly competitive weekly market environment
 - Negotiated supplier contracts, optimising the supply chain to drive cost-efficiency without compromising service quality
 - Analysed seasonal market trends to accurately forecast holiday demand, adjusting operational capacity and marketing strategies
 - Executed strategic resource allocation, balancing dynamic budgets across hiring, infrastructure procurement, and targeted advertising
 - Developed comprehensive financial strategies, managing capital structures, bank loans, and real-time Profit & Loss (P&L) tracking
- **IoT-Based Dual-Axis Solar Tracker System**
 - Designed an automated **Arduino-based** tracking system to maximize solar energy absorption
 - Optimized efficiency by engineering a data-driven control loop to align panels based on light intensity

RETAIL & HOSPITALITY EXPERIENCE

- **Online Assistant | Sainsbury's** *Part Time*
 - Executed high-volume online fulfilment orders during early morning shifts (4 AM–8 AM, 3 days/week)
 - Consistently achieved strict performance targets, maintaining a picking rate of **198 Items Per Hour (IPH)**
- **Supermarket Assistant | Waitrose** *Dec 25 – Jan 26*
 - Managed tills, customer service interactions, and online delivery execution during the peak Christmas break
 - Optimised shop-floor operations through proactive communication, active stocking, and inventory replenishment
- **Team Member | Taco Bell** *Part Time*
 - Thrived in a high-pressure hospitality setting by rapidly processing customer orders and managing front-of-house
 - Ensured seamless service execution by efficiently handling food preparation during peak operational hours

LEADERSHIP & ACHIEVEMENTS

- **All India Rank 16 (ABU ROBOCON):** Represented college in national robotics competition (2017-18)
- **Team Leader:** Led university Badminton team, coordinating training schedules and match logistics
- **Ubisoft UbiOlympics:** Secured 1st place in both Badminton and Carrom corporate tournaments

EDUCATION

- MSc Business Analytics & Management Science | University of Southampton, UK** *Sept 25 – Present*
 - Focus: Decision Analytics, Simulation Modeling, Risk Management, Data Mining, Strategic Management
- Bachelor of Engineering, Information Technology | Mumbai University, IND** *Aug 18 – May 22*
 - Core Coursework: Database Management Systems (DBMS), SQL, Data Structures, Information Systems
