Summary

Product Designer with 3 years of experience building intuitive, data-driven, and user-focused digital products, including AI-driven solutions. Passionate about simplifying complex workflows and creating meaningful experiences that enhance user satisfaction and product value.

Professional Experience

Company: Coditas Solutions | *UX Designer* | B2B, SaaS, Healthcare, AI

3 Years (Oct '22 - Oct '25)

Skills: Design System | Accessibility (WCAG) | Prototyping | Usability Testing | AI Service

- Established scalable design systems, ensuring consistency and speeding up product delivery.
- Optimized existing user flows to meet accessibility standards (WCAG), resulting in a **100% improvement in overall usability**.
- Led an AI-driven roleplay module, boosting sales practice by **75%** and increasing prospect conversions by **45% in one month**.
- Conducted user research, stakeholder interviews, and competitor analysis to define MVP scope and product direction for an AI-based mental well-being application.
- Designed **conversational UX flows for LLM training**, defining dialogue paths, tone, fallback handling, and contextual cues, resulting in a **69% improvement in patient engagement**.
- Translated complex business requirements into **high-fidelity prototypes and micro interactions**, accelerating leadership alignment and reducing development rework.

Company: Coditas Solution | *Associate UX Designer* | B2C, SaaS, LMS, FMS, HRM

Skills: UX Research | Journey Mapping | IA | Wireframing | Persona | User Flow | UI Design | Interaction Design | Human Centered Design Process | Leadership

- Led end-to-end design of **patient profile and medical file management** workflows, improving navigation clarity and reducing user errors by **12%**.
- Redesigned inventory tracking and categorization flows, resolving system inefficiencies and improving operational efficiency by **80%**.
- Designed a **Learning Management System (LMS)** with personalized learning paths, progress tracking, and role-based dashboards to improve learner engagement.
- Contributed to **HRM workflow design and system integrations**, streamlining recruitment processes and improving passive candidate conversion by **10%**, with a **4% increase in overall hiring ratio (FY'22)**.
- Created wireframes, prototypes, and UI specs aligned with business and technical needs.
- Worked cross-functionally with PMs, QA, and engineering teams to iterate designs based on usability feedback and data insights.

Company: Firstcry (Brainbees Solution) | *Product Stylist*

1.6 Years (Mar '20 - Jul'21)

Skills: Product Styling | Stop Motion | Research and Development | Creative Direction

- Led e-commerce styling and photography initiatives, driving creative R&D concepts that increased sales by **12%** and achieved **100K+ organic social views**.
